

THE DIY ACCURACY WORKBOOK

The Credit Report Field Guide

A practical system for obtaining all three reports, separating source facts from assumptions, documenting evidence, writing clear factual correspondence, and tracking what happens next.

READ	DOCUMENT	WRITE	TRACK
------	----------	-------	-------

Credit Comeback Club, LLC

2026 EDITION | EDUCATIONAL INFORMATION - NOT LEGAL ADVICE

START HERE

How to use this guide

Work in order, preserve the original record, and make every statement traceable to something you can show.

CORE RULE

A difference is a review flag, not automatic proof of an error. Your job is to identify the exact field, find reliable support, and describe only what the documents establish.

A disciplined four-part loop

1. READ	2. DOCUMENT	3. WRITE	4. TRACK
Obtain fresh reports and read each bureau separately.	Save source pages and supporting records without altering them.	State the exact item, the exact issue, and the correction or investigation requested.	Log delivery, responses, report changes, and the evidence behind your next decision.

Your working folder

- ☐ One folder for the current three-bureau report set, labeled with the date obtained.
- ☐ One account folder per creditor or collector, using only the last four digits in filenames.
- ☐ A correspondence folder with sent copies, enclosures, delivery records, and replies.
- ☐ A master log so you do not rely on memory.

PRIVACY

Do not place full Social Security numbers, full account numbers, passwords, or unnecessary medical or financial details in worksheets, filenames, or email subject lines.

This guide is educational and general. It does not determine whether your information is inaccurate, give legal advice, replace official instructions, or promise a result. Laws, policies, report formats, and deadlines can change; verify the current rule that applies to your facts.

ROADMAP

Your end-to-end review path

Use this map to know what “done” looks like at each stage before moving forward.

STAGE	OUTPUT	READY WHEN...
1. Obtain	Three dated report files	You can identify source, date, and owner for each report.
2. Inventory	One row per reporting item	Every item has a bureau, partial account ID, and page reference.
3. Compare	Field-by-field differences	You separated a difference from a supported inaccuracy.
4. Evidence	Source-backed issue file	Each claim traces to a report page and reliable supporting record.
5. Correspond	A focused factual letter	The recipient can identify the item, issue, support, and request.
6. Send	Complete mailing record	You retained exactly what was sent and proof of its date/method.
7. Analyze	Response worksheet	You compared the response and fresh report to your original issue.
8. Decide	Written next-step rationale	Your choice follows the evidence, not frustration or guesswork.

Stop signs

- You cannot identify which exact account or field you mean.
- Your support is an assumption, an online claim, or a recollection you cannot verify.
- You are tempted to change a date, copy someone else's story, or dispute accurate information.
- The issue involves identity theft, a lawsuit, a court order, a deceased person, mixed identity, active bankruptcy, or another situation that may need specialized guidance.

DECISION HABIT

At every stage, write one sentence answering: What do I know, how do I know it, and what remains unknown?

STEP 1

Obtain and preserve all three reports

A complete review starts with current, identifiable source documents - not screenshots stripped of context.

Capture the source context

- ☐ Obtain a report from each nationwide consumer reporting company using an official or otherwise reliable source available to you.
- ☐ Save or print the complete report, including headers, legends, disclosures, and page numbers.
- ☐ Record the date obtained and the date the report says it was generated or updated.
- ☐ Confirm the file belongs to you before storing or reviewing it.

Name files consistently

EXAMPLE

2026-08-22_Equifax_full-report.pdf
2026-08-22_Experian_full-report.pdf
2026-08-22_TransUnion_full-report.pdf

Preserve before annotating

- Keep one untouched original. Work from a copy if you highlight or add notes.
- Do not crop away bureau name, report date, page number, section label, or account identifier.
- If viewing online, save the complete accessible file when possible; a single-screen screenshot may omit context.
- Store the files in a secure location with device and account protections appropriate for sensitive personal information.

IF A REPORT IS UNAVAILABLE

Write down the date, source, exact error message, and steps attempted. Do not invent missing fields or substitute another bureau's data.

WORKSHEET 1

Three-report source registry

Complete this before reviewing accounts. It creates a clean chain back to the original report set.

BUREAU / SOURCE	DATE OBTAINED	REPORT DATE	FILE NAME / LOCATION	COMPLETE?

Preservation check

- ☐ I retained an untouched original for each report.
- ☐ The bureau/source and report date are visible.
- ☐ Pages are complete and in order.
- ☐ My working copy uses highlights or notes without changing the source text.
- ☐ My storage location is access-controlled and backed up appropriately.

Reviewer

Review started

Report set label

Notes

STEP 2

Learn the anatomy before comparing

Labels differ by source and bureau. Read the report's own legend before treating two labels as equivalent.

AREA	WHAT TO CAPTURE	COMMON REVIEW QUESTION
Identity	Names, addresses, employers, file identifiers	Does this entry relate to me, and is it presented accurately?
Account identity	Furnisher, partial account number, type	Am I comparing the same obligation across reports?
Status	Open/closed, current/delinquent, collection, charge-off	What does this source label mean in this report's legend?
Amounts	Balance, past due, payment, limit or original amount	Are the field labels and effective dates comparable?
Dates	Opened, updated, closed, payment or delinquency dates	Which event does each date actually describe?
History	Month-by-month symbols or status grid	Does the legend explain every symbol I am reading?
Remarks	Comments, dispute notation, responsibility	Is the remark current, attributable, and supported?
Inquiries / records	Requester, date, type, public-record details	Is the entry mine and is the identifying information accurate?

Never compare labels in isolation

- A balance may reflect a different update date than another bureau's balance.
- Two account numbers may be masked differently.
- A status summary may coexist with a separate historical grid.
- A collector and original creditor can both appear without necessarily being duplicate reporting.

READ THE LEGEND

If you cannot define a symbol or field from the report itself, mark it unknown until you find reliable context.

STEP 3

Build an account inventory

Create one normalized row for every item on every report before deciding what to dispute.

Use stable identifiers

- Record the furnisher or collector exactly as shown.
- Use only the last four digits or another safe partial identifier.
- Give each item your own neutral ID, such as A-01, A-02, and A-03.
- List bureau-specific appearances separately first; link them only after confirming they describe the same account.

Minimum fields

IDENTITY	STATUS / AMOUNTS	DATES / HISTORY	SOURCE
Neutral ID; bureau; furnisher; partial account ID; responsibility	Status; balance; past due; payment; limit/original amount	Opened; updated; closed; key timeline dates; history symbols	Report date; page; section; saved excerpt name

A useful inventory is descriptive, not argumentative

GOOD NOTE	"TransUnion report dated 08/22/2026, page 14, shows balance \$____ and updated date ____."
TOO EARLY	"This account is illegal and must be deleted." The inventory stage has not established either conclusion.

Keep blanks honest. Write "not shown" when a field is absent and "unknown" when you do not yet understand it. Do not turn either into a zero, a date, or a fact.

WORKSHEET 2

Account inventory

Use additional copies as needed. One row should describe one bureau appearance of one reporting item.

ID	BUREAU	FURNISHER / COLLECTOR	LAST 4	STATUS	BALANCE	PAGE

SAFE NOTATION

Use partial identifiers only. If a full account number appears in a report, do not reproduce it in this worksheet.

Report set label

Inventory completed by

Date completed

Items needing identity match

STEP 4

Separate source facts from assumptions

This distinction is the heart of a truthful dispute file.

TYPE	DEFINITION	EXAMPLE	ACTION
Source fact	A detail visible in a preserved document.	"Report page 8 lists the account as open."	Cite the source and page.
Corroborated fact	Two or more reliable records establish the same point.	"The report and closing letter identify the same last four digits."	Retain both records.
Difference	Sources show different values or labels.	"One report lists \$___; another lists \$___."	Check dates and definitions.
Assumption	A conclusion not yet supported by the record.	"Different balances mean fraud."	Do not assert it as fact.
Unknown	The source does not answer the question.	"The report does not show which date controls."	Seek clarification or records.

The three-sentence test

- The report says: quote or accurately paraphrase the exact field and identify its page.
- My supporting record says: identify the document, issuer, date, and relevant detail.
- Therefore I can truthfully ask: request investigation or a specific correction that follows from those records.

EXAMPLE

Report page 12 shows a late payment for March 2025. My statement dated April 2, 2025, shows the March amount received on March 15. Please investigate the March 2025 payment-history notation and correct it if it cannot be verified as accurate.

Avoid upgrading a concern into certainty. "I do not recognize this" is different from "this is identity theft." "These values differ" is different from "the lower value is correct."

WORKSHEET 3

Fact / assumption ledger

For each concern, write the strongest statement your actual records support - no stronger.

ITEM / FIELD	REPORT FACT + PAGE	SUPPORTING FACT + SOURCE	UNKNOWN / ASSUMPTION	SAFE NEXT STEP

- ☐ Every "fact" above is visible in a saved source.
- ☐ Every difference accounts for report dates and field definitions.
- ☐ I did not state a legal conclusion I cannot establish.
- ☐ I marked unresolved questions as unknown.

STEP 5

Build an evidence packet

Relevant, readable, safely redacted support is more useful than a pile of unrelated pages.

Evidence hierarchy

STRONGER CONNECTION	USE WITH CARE	NOT PROOF BY ITSELF
Official account statements; payment confirmations; creditor correspondence; court or government records; identity records when necessary	Bank records with unrelated transactions; screenshots without source/date context; third-party summaries	Your recollection; a template claim; social-media advice; another person's result; a difference with no date/definition analysis

Create a simple exhibit index

- Exhibit A: relevant report page, with the exact item marked on a working copy.
- Exhibit B: supporting statement or letter showing the contradictory detail.
- Exhibit C: additional support only if it materially helps identify or verify the issue.

Redact safely

- ☐ Retain the unredacted original securely.
- ☐ Send only information reasonably needed for identification and investigation.
- ☐ Redact unrelated account numbers, transactions, medical information, and household-member data.
- ☐ After redacting, export/print a new copy and verify hidden text cannot be revealed or copied.
- ☐ Never use opaque rectangles that merely cover live text in an editable file.

QUALITY CHECK

Open every enclosure as the recipient would. Confirm it is legible, oriented correctly, complete enough to understand, and tied to one of your factual statements.

WORKSHEET 4

Evidence index

Give every enclosure a purpose. If you cannot explain why it matters, do not automatically include it.

EXHIBIT	DOCUMENT / ISSUER	DATE	WHAT IT ESTABLISHES	REDactions CHECKED	PAGE S

Packet relates to item ID

Issue being supported

Unredacted originals stored at

Final packet reviewed by

STEP 6

Select truthful, supportable issues

A focused letter can be easier to understand and investigate than a broad list of every possible complaint.

POSSIBLE REVIEW AREA	VERIFY BEFORE ASSERTING
Identity / ownership	What records connect or do not connect you to the item? Is this a recognition issue, mixed identity concern, or documented identity theft?
Account identity	Do bureau entries truly refer to the same obligation? Compare furnisher, collector, dates, balance, and masked number.
Status	What does the report's label mean, and what dated source shows a different status?
Amounts	Are balance, past due, payment, limit, and original amount separate fields? Do update dates differ?
Dates	Which event does each date represent? Do not assume opened, updated, closed, or delinquency dates are interchangeable.
Payment history	Which bureau, month, symbol, and supporting statement are involved?
Remarks / responsibility	What exact remark or responsibility code appears, and what reliable record contradicts it?
Reporting age	What event and rule control for this information? Verify the current law and complete timeline before claiming obsolescence.

Selection test

- ☐ I can identify the recipient, bureau, account, and exact field.
- ☐ I can cite the report date and page.
- ☐ I have reliable support or I have clearly framed the issue as a request to investigate an unknown.
- ☐ My requested outcome follows from the issue and does not demand deletion without a factual basis.

TRUTH OVER VOLUME

Do not dispute accurate information, invent a reason, copy allegations that do not match your file, or submit the same unsupported statement repeatedly.

WORKSHEET 5

Issue selection sheet

Complete one row per issue you may include. The “why truthful” column is your internal accuracy check.

ITEM ID	BUREAU + FIELD	EXACT ISSUE	WHY TRUTHFUL / SUPPORT	REQUEST	INC LU DE?

BEFORE WRITING

Choose the clearest supported issues. Leave unresolved guesses in your research notes rather than presenting them as established facts.

STEP 7

The anatomy of a factual letter

Make it easy for a reader to identify you, locate the item, understand the issue, review the support, and respond.

PART	PURPOSE	INCLUDE
Sender + date	Identify the consumer and correspondence date.	Name, safe return address, date actually sent.
Recipient	Route the request correctly.	Current recipient name/address verified from an official source.
Subject	Describe the communication.	Credit report dispute or investigation request; report/file reference if appropriate.
Identification	Help locate the file/item.	Only the information reasonably requested; partial account identifier in the letter body.
Issue statement	Define one testable concern.	Bureau, furnisher, field, displayed value, report date/page.
Supporting facts	Show why the issue deserves investigation.	Document name, issuer, date, and relevant fact.
Request	State what you want done.	Investigate and correct, delete, or clarify only as supported by your facts.
Enclosures	Connect evidence to the letter.	A short exhibit list; copies rather than irreplaceable originals.
Signature	Close the correspondence.	Your truthful signature and a retained final copy.

TONE

Clear and specific beats dramatic. Avoid threats, invented deadlines, legal conclusions you have not verified, and accusations unsupported by your documents.

WORKSHEET 6

Fill-in correspondence framework

Draft from facts. Replace every bracket with your real information and remove any sentence that does not apply.

IMPORTANT

This is a writing framework, not a prewritten legal demand. Verify the recipient's current instructions and address before sending.

[Your full name]

[Your mailing address]

[City, state ZIP]

[Date actually sent]

[Recipient name]

[Recipient dispute address]

[City, state ZIP]

Subject: Request to investigate specific credit-report information

To whom it may concern:

I am writing about [bureau/source] report dated [date]. On page [page], [furnisher/collector], account ending [last four only], shows [exact field and displayed value].

I dispute this specific information because [concise, truthful reason supported by your records]. [Supporting document name], dated [date], shows [exact supporting fact]. A copy is enclosed as [Exhibit].

Please investigate the identified information and [correct it to the supported value / delete it if it cannot be verified accurately / provide the result appropriate to your documented facts]. Please send the results and an updated report or other response available under the process that applies.

Sincerely,

[Signature]

[Printed name]

Enclosures: [Exhibit A - ...]; [Exhibit B - ...]

DO NOT

Backdate the letter; use a fabricated identity-theft claim; include someone else's facts; state that a difference automatically proves illegality; or leave unused bracket text in the final copy.

WORKSHEET 7

Letter drafting canvas

Write the facts in plain language before assembling the final letter.

Recipient + verified address

Report source + date + page

Furnisher + last four

Exact field + displayed value

Truthful issue statement

Supporting document + date

Exact supporting fact

Requested investigation /
correction

Enclosures

Plain-language review

- ☐ A reader can tell exactly what field I dispute.
- ☐ Each factual sentence traces to a source.
- ☐ My request matches what the evidence could establish.
- ☐ I removed anger, filler, copied legal claims, and irrelevant history.

STEP 8

Assemble and send safely

Follow the recipient's current submission instructions and keep a complete, dated record of exactly what left your hands.

Final packet order

- ☐ Signed final letter.
- ☐ Copy of the relevant report page or excerpt with enough context to identify the source.
- ☐ Relevant supporting records, labeled to match the enclosure list.
- ☐ Identity/address documents only when required, with unnecessary data minimized.

Choose a submission method

- Use an official address, portal, or channel currently designated for the type of request you are making.
- Select a mailing or electronic method that gives you the record you reasonably need. Availability and evidentiary value vary.
- If submitting online, save confirmation pages, reference numbers, uploaded filenames, and the exact text entered.
- If mailing, retain the final packet and the postal or carrier record showing the actual send date.

Before sealing or clicking submit

- ☐ Recipient is correct; address or portal is current.
- ☐ Dates are real and not backdated.
- ☐ Every exhibit is referenced and legible.
- ☐ No originals are included unless specifically necessary and safe.
- ☐ Unrelated sensitive data is removed safely.

ONE SOURCE OF TRUTH

Save the final sent version as a read-only PDF and record its filename in the mailing log. Do not rely on a draft that may later change.

WORKSHEET 8

Correspondence and delivery log

Use one row per recipient and submission. Dates should come from records, not memory.

SENT	RECIPIENT	ITEM / ISSUE	METHOD + TRACKING / CONFIRMATION	DELIVERED / RECEIVED	RESPONSE DUE?*

*A planning date is not a legal conclusion. Calculate only after identifying the process, confirming receipt where relevant, and checking current official guidance for extensions or exceptions.

Final packet filename

Proof stored at

Follow-up reminder

Notes

STEP 9

Track timing without blanket claims

Different recipients, request types, delivery events, and circumstances can produce different timelines.

**AVOID THE
SHORTCUT**

Do not write “they always have 30 days” in your log or letter. A commonly discussed period may not apply exactly as assumed, and extensions, exceptions, or different rules may matter.

Build a defensible timing note

QUESTION	YOUR SOURCE
What process did I use?	Official recipient instructions and a copy of my submission.
What event starts timing?	The governing rule/guidance and proof of the relevant event, such as receipt if applicable.
What period applies?	Current official statute, regulation, agency guidance, or qualified advice matched to my facts.
Could it be extended or changed?	Check for additional information, method-specific terms, weekends/holidays, exceptions, or another applicable process.
What actually happened?	Delivery record, confirmation, response date, and fresh report date.

Practical tracking

- Record the actual sent date and any confirmed receipt date separately.
- Set an internal review reminder before your calculated checkpoint.
- Keep envelopes, electronic headers, notices, and any request for more information.
- If timing becomes legally significant, verify the current rule or seek qualified help rather than relying on a template.

Process used

Receipt event/source

Rule/guidance checked

Planning checkpoint

Possible extension/exception

Actual response date

STEP 10

Analyze the response against your issue

A response is not the finish line. Compare it to what you actually sent and what the current report now shows.

Three-document comparison

YOUR LETTER	THE RESPONSE	THE FRESH REPORT
What exact item, field, value, support, and request did you identify?	What did the recipient say was investigated, changed, verified, deleted, or not processed? What dates and references appear?	What does the same item show now? Are the source, date, field labels, and account identity comparable?

Classify the outcome descriptively

- Corrected as requested: the disputed field now matches the supported value.
- Changed differently: information changed, but not in the way you requested.
- Reported as verified / unchanged: preserve the response and determine what, if anything, it explains.
- Deleted or removed: identify the item and date; do not assume permanence or a reason not stated.
- Unable to process / more information needed: record the exact reason and requirements.
- No response located: re-check delivery, timing, address/channel, and records before deciding what that means.

FRESH EVIDENCE

Obtain a new report or reliable current view when needed. Do not infer the present status from an old report or from a response summary alone.

WORKSHEET 9

Response analysis

Complete one sheet per response or recipient.

Recipient + response date

Reference / confirmation

Original item + disputed field

Original request

Response wording (brief, exact)

Fresh report source + date + page

Current displayed value

Evidence still unresolved

Outcome description

Completeness check

- ☐ I compared the response with the exact sent letter, not a draft.
- ☐ I saved the response, envelope/email metadata, and fresh report.
- ☐ I distinguished “verified,” “unchanged,” and “correct.”
- ☐ I did not assume why a change occurred unless the response says so.

STEP 11

Decide the next step from the record

Your next action should have a written reason, a defined purpose, and support that improves the file.

WHAT THE RECORD SHOWS	POSSIBLE NEXT STEP TO EVALUATE
The specific supported issue was corrected	Archive the result, update your log, and monitor future reports for accuracy.
The response requests identifiable missing information	Confirm the request is legitimate and relevant; provide only what is safely necessary through an official channel.
The item is unchanged and your evidence remains clear	Review whether the prior letter precisely stated the issue and whether additional reliable evidence or an appropriate current process is available.
You discovered your assumption was wrong	Correct your notes, stop asserting the unsupported issue, and retain the learning trail.
The response or report creates a new, distinct factual issue	Document it separately; do not silently rewrite the original claim.
The matter involves fraud, mixed files, litigation, court records, regulatory complaints, or material harm	Consider current official resources or advice from a qualified professional appropriate to the issue.
You have no new fact, document, or clarification	Pause. Repetition alone does not strengthen an unsupported claim.

Next-step memo

Decision

Facts supporting this decision

What changed since last submission

THE STANDARD

A careful file is reproducible: another reader can follow each statement back to a source, see what was sent, and understand why the next step was chosen.

Credit Comeback Club, LLC

This workbook is educational information for organizing a credit-report accuracy review. It is not legal advice, does not create an attorney-client relationship, and does not promise deletions, score changes, or any other outcome. Verify current official instructions and rules for your situation.

CLIENT EXPERIENCES

What the process felt like

Results vary. These already-published CCC client experiences speak to education, communication, and real-life goals - not a promised outcome.

CLIENT EXPERIENCE

"What made Credit Comeback Club different was the education piece. Chris doesn't just send letters and collect a check - he explains the process. My score went up 110 points."

Jasmine W.

CCC client · Education and a reported 110-point change

CLIENT EXPERIENCE

"I was in a pinch trying to buy a new house. Chris said he might be able to help. He got my 615 credit score to over 710 in unbelievable time. Two and a half years later, I'm in my new house and still grateful."

Noah P.

CCC client · Homebuying goal

CLIENT EXPERIENCE

"He doesn't leave you in the dark like a lot of credit repair gurus do. I've had much success using Chris's methods, as have the clients I've referred to him."

Karl E.

CCC client and referral partner · Communication and support

Testimonials describe individual experiences previously published by Credit Comeback Club. They do not promise a deletion, score change, timeline, approval, or any other outcome. Score sources and scoring models may differ.

YOUR NEXT MOVE

You can do this yourself. You do not have to do it alone.

This guide gives you a complete starting system. The real work is applying it carefully, preserving the record, and making disciplined decisions as new information arrives.

DIY is absolutely possible.

But reading three reports line by line, organizing evidence, drafting factual correspondence, tracking every submission, and reviewing each response takes time and attention to detail. If you would rather have an experienced team manage that workload with you, let's talk.

Schedule a no-pressure consultation →

No pressure. No guaranteed outcomes. We will look at where you are, what you are trying to accomplish, and whether CCC is a sensible fit.

Bring these to the conversation

- ☐ Your current three-bureau reports, if available.
- ☐ The two or three items creating the most confusion or urgency.
- ☐ Your real-world goal - housing, transportation, funding readiness, or simply a cleaner record.
- ☐ Any known deadline, denial notice, or recent correspondence you want us to understand.
